

Boxer Hears Sentence For Hotel Robbery

Leverne Roy Lee, 21, who pleaded guilty of the April 9 robbery of \$260 from the Georgian Hotel, 1420 Fourth Av., was sentenced today to serve not more than 30 years in the state penitentiary.

Presiding Judge Donald A. McDonald said the minimum term will be set by the State Board of Prison Terms and Paroles.

A second robbery charge against Lee was dismissed on the state's motion.

Lee, a professional boxer, had admitted several burglaries and motel robberies.

15 Years Recommended

Joseph Coleman, 41, who pleaded guilty of second-degree murder, was sentenced to not more than 20 years in prison.

Judge McDonald joined Deputy Prosecutor John P. Lyette, Jr., in recommending that Coleman serve at least 15 years.

Coleman admitted that on December 21 he beat and strangled Bertha Ruth Neal Williams, 23, to death in his room at 216 Fifth Av. S. He told police he was under the influence of liquor.

'You're Lucky'

"You're lucky you're not here on a first-degree murder charge," Judge McDonald commented.

Ernest William Hurley, 34, of 319 Eighth Av. N., who pleaded guilty of automobile theft, was sentenced to no more than ten years in prison.

Sentencing of John Richard Hockenson, 18, a high school pupil, 835 E. 190th St., was deferred for three years on condition he make restitution and serve six months in the county jail, starting at the end of June school June 15, with credit given for time already served.

He pleaded guilty of second-degree burglary.

Sentencing of George R. Olivas, 21, a cannery worker, who pleaded guilty of automobile theft, was deferred for three years on condition he serve 2½ months in the county jail, with credit given for time served since February 16.

Seattle Bid On Alaska Job May Be Low

A syndicate of three Seattle construction firms submitted the apparent low bid of \$5,542,961 today for replacing the burned facilities at the Army's Alaska port of Whittier.

The bids were opened by the Seattle office of the Alaska District of the Army Engineers. The apparent low bid for the over-all project was by Manson-Osberg-Scheumann & Johnson.

The government's over-all estimate was \$3,950,426. The bids will be forwarded to the Alaska District engineer at Anchorage for study and possible award.

The apparent second low bid was \$5,627,591 by Mullen-Rolandi of Seattle.

The bids ranged up to \$6,824,054, by a big syndicate including Morrison-Knudsen, Pomeroy, Denali and Koon-Bowen-Egge-Cummins.

The biggest item in the project is a 1,000-foot-long steel-pile and concrete wharf to replace the one destroyed in last year's multimillion dollar fire. The project also includes a huge storage building, more than a mile of railroad track, dredging, and utilities.

Queen's Children Wait at Tobruk

TOBRUK, Libya, April 30.—The royal yacht Britannia sailed into war-scarred Tobruk harbor today, carrying young Prince Charles and Princess Anne to a reunion with their globe-trotting parents.

Queen Elizabeth and the Duke of Edinburgh will fly into the nearby desert air field of El Adem tomorrow morning from Uganda, Central Africa.

Study Shows Gravel Caused 'Glass Pox'

By Associated Press. PITTSBURGH, April 30.—Pittsburgh Plate Glass Co. said today its research laboratory has found "no unusual phenomenon" associated with damaged windshields shipped here from areas reporting an epidemic of pock-marked glass.

The company said that "all marks on the various types of windshields had been caused by impact with gravel, cinders, limestone or similar materials."

Dr. Frank Cox, director of glass research for Pittsburgh Plate, producer of windshield safety glass, said:

"By propelling stones, gravel and similar materials against windshield glass in laboratory tests, we produced crush marks identical under microscope examination to the marks found on the windshields shipped here."

Exceptionally heavy damage had been reported at Seattle, Detroit and Canton, Ohio. Glass from all three sections was tested.

Dr. Cox said all of the windshields were scanned with a scintillation counter—an extremely sensitive type of radiation detector—and that there was no evidence of radioactive

materials in or on the windshields.

Dr. Cox said tests also were made to determine the effect of electrostatic charges from the atmosphere. He added:

"A charge of 172,000 volts would be required to pierce a windshield. It is not known how such voltage could be developed on an automobile windshield under normal conditions."

Dr. Cox also reported: "The glass technician said very few chemicals have any effect on glass. Chemically attacked glass has a frosted appearance and the surface is not pitted. Any known chemical that can attack glass will also attack people and car bodies."

Dr. Cox said it was generally found that older cars or cars with high mileage were more affected than newer cars.

MORE REPORTS—HAVRE DE GRACE, Md., April 30.—Police and used-car dealers sought today to find what caused the pock marks or cracks in the windshields of nearly 250 cars here.

The cars, discovered damaged yesterday, were all parked on used-car lots. Damage was confined to the windshields regard-

Descendant Of Japanese Lord To Visit Here

Naoyoshi II, 43, great-grandson of a feudal lord who helped open Japan to Western trade, will stop in Seattle on his way to visit President Eisenhower, the Associated Press reported today.

Mayor Ii is a descendant of Naosuke II, who joined with Commodore Perry in signing Japan's first treaty with the United States in 1854.

Mayor Ii's title of count was abolished under American occupation forces. His city is an old castle town, 190 miles west of Tokyo, where the fortress of the feudal lord still stands.

less of the angle at which the cars were parked. Some marks were round, like a B-B shot had made them. Others looked as if they may have been made by sharp objects.

Bremerton Couples Will Complete Swap on Mates

By Associated Press. BREMERTON, April 30.—Two well-to-do Bremerton couples, who often went on camping trips and social outings together, will complete a swap of mates at a scheduled marriage tomorrow.

John E. Walton 38 owner of a bowling alley and the former Mrs. Keith Branch 35, said today they will be married tomorrow night in Seattle at the home of her parents, Mr. and Mrs. William Roller.

They obtained a marriage license yesterday at Coupeville. Both said the partner exchange was not premeditated, but was the outgrowth of a double divorce April 5. The divorce complaints each accused Branch and the former Mrs. Walton of becoming infatuated with one another.

Branch, 35, a partner in a Bremerton construction firm, and the former Mrs. Walton, 36, were married April 10.

The Waltons had been married since 1934, the Branches since 1940. They were long-time friends, but not neighbors. Both couples had two children of almost the same age.

The former Mrs. Walton gained custody of her son, 15, and daughter, 6, with visitation rights for the father. The Branches were given joint custody of their son, 12, and a daughter, 6.
