Bringing Up Baby
Hints Collected by The Sun Booklet (Mother of 5)

A new baby's cries often bewilder a first-time mother. But it's comforting to remember that crying is a natural part of a baby's life. Apart from some physical discomfort (like hunger, need of a diaper change or bubbling), crying is baby's only means of communicating with you. For example: baby may be lonely or bored and just longing for the reassurance of a heartfelt cuddle, seasoned with a couple of crooning words. Another comforting thought: the assorted hugs and squeezes baby loves so much, give you a glow of satisfaction, too.

Many doctors prescribe orange juice (for its high Vitamin C content) at a very early age. Important facts to remember about Gerber's Strained Orange Juice: it's made from tree-ripened oranges, selected for high Vitamin C content and mild, natural flavor. Processed just for babies, it has minimum peel oil for easy digestibility... is carefully pasteurized for baby's protection.

Youths Admit Arson To Stir Excitement
CHICAGO (AP)—Police said three teen-age youths have admitted setting fire to a North Side school because of a thirst for "excitement."
The fire at the Mulligan School Sept. 28 caused an estimated \$7,500 damage.
Held on open charges were William Castle, 15, a Lane Technical High School sophomore; Edward Adams, 14, an 8th grader at Mulligan, and Lawrence Armato, 14, a Mulligan 8th grader.
During police questioning of the girl said she passed the school shortly before the fire was discovered. She identified a student she had seen running past. The student told of seeing Castle and two other youths in the schoolyard, police said.
Castle confessed, police said, Monday and implicated Adams and Armato.

Patience pays. If baby seems bewildered by his first try at cereal, be patient. There's a big difference between textured food and milk taken from a nipple. Helpful hints: try making the consistency very soupy at first. Serve only tiny portions, placed well back on baby's tongue.
